FEATURES

- Microcontroller based state of the art fully featured design.
- Digital display with user friendly keys
- True RMS voltage and current measurement
- LED indication of each fault
- Auto pump protection setting
- Operating voltage range 300 to 470 Vac at 50Hz- 3 Ø
- Current range 0.5A-90A
- Motor ON/OFF through IVRS, Missed call and SMS
- IVRS in three languages / Hindi, Marathi and English.
- Real time voltage and current information through IVRS
- All settings change through SMS
- Auto-manual setting through SMS and IVRS
- Unique fault feedback call facility
- ALL protection ON/OFF through SMS
- Suitable for jio card or 4G

PREVENTION AGAINST

- | | |
|--|---|
|  Dry Run |  Overload |
|  High Voltage |  Low Voltage |
|  Extreme high current |  Voltage & current unbalance |
|  Phase failure form I/P or O/P side |  Phase reversal |

ADJUSTABLE

Dry Run current
& trip time

High voltage
& low voltage

Overload current
& trip time

Pump
ON timer
